International Mining Geology
Conference 2019
Conference Chair

On behalf of the organising committee, I am pleased to announce the International Mining Geology Conference 2019 in Perth, Western Australia. The International Mining Geology Conference series is the premier event in the world of Mining Geology.

With the increasing pace of change and emerging technologies in the mining industry, this conference will focus on the future of our industry and the impacts on mining geology and the mine

value chain. With the rate of change in mind, we have moved the conference to a bi-annual two-day event to make sure we keep ourselves relevant to new advances in the industry.

This call for papers requests abstracts to be considered for inclusion in the conference program. Practical and applied case studies, illustrating good practice and innovation are welcomed, as well as papers illustrating new and emerging methods and technologies.

We encourage young professionals to get involved with the conference and invite them to submit

abstracts for poster style presentations. We are working with the Student and New Professionals groups to host several events during the conference focused on developing core skills.

Intending authors should submit a 300 word abstract by 4 March 2019 for consideration by the organising committee. Upon acceptance, full papers will be required by 1 July 2019 for peer review.

The organising committee and I look forward to welcoming you to Perth, to network with old friends, make new ones, and learn lots about mining geology.
